ECOLOGICAL ECONOMICS

Contents of *Ecological Economics*, Vol. 29

Vol. 29 No. 1 APRIL 1999

Letters to the Editor
[Environmental sustainability in agriculture: diet matters, Ecol. Econ. 23, 189–200.] 1

News and Views
On Georgescu-Roegen's contribution to ecological economics
P.A. Lawn (Australia) 5
Uncertainty and sustainability
R. Hueting and L. Reijnders (Netherlands) 9

Commentary
Special Section: ECOLOGICAL ECONOMICS FORUM:
Why sustainability analyses must include biophysical assessments
M. Wackernagel (Mexico) 13
Should sustainability analyses include biophysical assessments?
R.A. Herendeen (USA) 17
Biophysical assessments: who cares?
J.D. Yount (USA) 19
Consuming the earth: the biophysics of sustainability
W.E. Rees (Canada) 23
How to make progress toward integrating biophysical and economic assessments
G.-M. Lange (USA) 29
Why biophysical assessments will bring distribution issues to the top of the agenda
F. Luks and M. Stewen (Germany) 33
The business of sustainability
L. Onisto (Mexico) 37
Prices are not worth much
I. Røpke (Denmark) 45
Monetary analysis: turning a blind eye on sustainability
W.E. Rees and M. Wackernagel (Canada, Mexico) 47
Dematerialization, MIPS and Factor 10 Physical sustainability indicators as a social device
F. Hinterberger and F. Schmidt-Bleek (Germany, France) 53
Why human societies need sustainability analyses based on biophysical assessments
L. Lewan (Sweden) 57

Tenth Anniversary Invited Paper
Spatial sustainability, trade and indicators: an evaluation of the 'ecological footprint'
J.C.J.M. van den Bergh and H. Verbruggen (Netherlands) 61

Analysis
Applying the concept of natural capital criticality to regional resource management
D.V. MacDonald, N. Hanley and I. Moffatt (UK) 73

Is enironmental degradation an inevitable consequence of economic growth: tunneling through the environmental Kuznets curve
M. Munasinghe (USA) 89
Estimating costs of protecting global ecosystem diversity
J. Lewandrowski, R.F. Darwin, M. Tsigas and A. Raneses (USA). 111
Power distribution, the environment, and public health: A state-level analysis
J.K. Boyce, A.R. Klemer, P.H. Templet and C.E. Willis (USA) 127
Sustainable economic structures
R. Dellink, M. Bennis and H. Verbruggen (Netherlands) 141
Green accounting for a sustainable economy: Policy use and analysis of environmental accounts in the Philippines
P. Bartelmus (USA) 155

Book reviews 171

Vol. 29 No. 2 **MAY 1999**

Editorial
The ecology of ecosystem services: introduction to the special issue
K.E. Limburg and C. Folke (Sweden) 179

Commentary
Linking Nature's services to ecosystems: some general ecological concepts
J. Norberg (Sweden) 183
Rediscovering place and accounting space: how to re-embed the human economy
C. Borgström Hansson and M. Wackernagel (Sweden, Mexico, USA) 203

Analysis
Ecological goods and services of coral reef ecosystems
F. Moberg and C. Folke (Sweden) 215
The ecological basis for economic value of seafood production supported by mangrove ecosystems
P. Rönnbäck (Sweden) 235
Ecosystem services generated by fish populations
C.M. Holmlund and M. Hammer (Sweden) 253
Impact of production intensity on the ability of the agricultural landscape to generate ecosystem services: an example from Sweden
J. Björklund, K.E. Limburg and T. Rydberg (Sweden). 269
Ecosystem services in urban areas
P. Bolund and S. Hunhammar (Sweden). 293
Ecotourism: a means to safeguard biodiversity and ecosystem functions?
S. Gössling (Sweden). 303

Vol. 29 No. 3 **JUNE 1999**

News and Views
All of Keynes horses ... : the need for end-goal driven assessment of ecosystem services
H. Glasser and P.P. Craig (USA) 321

Commentary
Some remarks on the 'System of Integrated Environmental and Economic Accounting' of the United Nations
H.W. Holub, G. Tappeiner and U. Tappeiner (Austria) 329

Tenth Anniversary Invited Paper
Toward consilience between biology and economics: the contribution of Ecological Economics
J.M. Gowdy and A. Ferreri Carbonell (USA, The Netherlands) 337

Methods

Balancing conservation and economic gain: a dynamic programming approach
P.F. Doherty, Jr., E.A. Marschall and T.C. Grubb, Jr. (USA) 349
What environmental pressures are a region's industries responsible for? A method of analysis with descriptive indices and input–output models
P. Eder and M. Narodoslawsky (Spain, Austria) 359

Analysis

National natural capital accounting with the ecological footprint concept
M. Wackernagel, L. Onisto, P. Bello, A. Callejas Linares, I. Susana López Falfán, J. Méndez García, A. Isabel Suárez Guerrero and M. Guadalupe Suárez Guerrero (Mexico) 375
On biodiversity access, intellectual property rights, and conservation
M.G. Bhat (USA) 391
Ecological restructuring for sustainable development: evidence from the Australian economy
T. Picton and P.L. Daniels (Australia) 405
Modeling the effects of agricultural production. An integrated economic and environmental analysis using farm account statistics and GIS
E. Skop and J.S. Schou (Denmark) 427
Carrying capacity in agriculture: global and regional issues
J.M. Harris and S. Kennedy (USA) 443
Uncertainty, risk aversion, and the game theoretic foundations of the safe minimum standard: a reassessment
D. Palmini (USA) 463
The second law, the fourth law, recycling and limits to growth
R.U. Ayres (France) 473
